

EyeCam

- Small and Portable
- Works With Any Standard Eye Tube
- USB & RCA Models Available

Camera Type

1/3 inch color C-MOS chip
(1/2 inch color C-MOS chip for 3.1 megapixel option)

Signal System

Direct to PC by USB port (NTSC or PAL video available)

Picture Element

1.3 Megapixel – 1280 x 1024 (standard)
3.1 Megapixel – 2048 x 1536 (optional)

Sensitivity

5 lux

Microscope Compatability

Fits standard 23mm eyepiece tubes
30mm stereoscope adapter included

Output

6-foot cord with composite video (RCA) or USB

Power

USB powered -- no additional power required

The EyeCam eyepiece camera is available with an RCA output or USB connection. Plug it in to your TV, VCR, or computer. Then attach it to any microscope for instant video micrography. The innovative EyeCam eyepiece camera slips into any standard microscope eyepiece tube, in place of the eyepiece, for crisp imaging in an instant.

Part#	Description	Connection
EYE-V	EyeCam video	RCA
EYE-U	EyeCam with software	USB
